REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **7 and 8** are allowable over the prior art of record because the prior art does not teach or suggest a method of making a supported mask that may be used in modifying a substrate, comprising the steps of obtaining, applying and exposing as presently claimed, esp., the step of exposing said layer to patterned light to substantially cause removal of said layer from said support in exposed areas, wherein the exposing causes ablating of the exposed areas of the layer.

The prior art does not contain any language that teaches or suggests the above. *Van/segheem* teaches etching the revealed support membrane which results in abrading the membrane and the underlying surface. This is not the same as patterning a layer of dielectric material by exposing the layer to patterned light which causes ablation of exposed areas of the layer. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
